

Waste-Free Lunch Challenge

Thank you to our school community for participating in last week's Reusable Water Bottle challenge. It was a huge success!!

SAM's environmental challenge for Wednesday, April 17, is to bring a Waste-Free Lunch. We encourage all students to participate by:

- Bringing reusable metal spoons and forks instead of plastic disposable ones.
- Using reusable containers instead of zip-lock plastic bags.
- Packing more fruit, veggies, and homemade treats instead of packaged foods. Snacks like Bear Paws, Gold fish, and granola bars generate a lot of non-recyclable plastic, which is very bad for the Earth.
- Bringing paper straws instead of plastic ones. Or, even better, avoid the use of straws at all!

Step to the challenge, SAM!! **It is never too late to start helping the Earth!!!**
